December 17, 2019

Patient: **ANGEL JAVIER**  
Date of Birth: **12/16/2019**  
Date of Visit: **12/16/2019**

To whom it may concern:

This letter is written on behalf of Angel Javier regarding patient's traumatic history. Patient has been following at our clinic and previously with Dr. Hildred Machuca for many years. This is my first time meeting the patient. Based on extensive chart review, patient has a history of being bullied and punched in the genital region by some classmates in 2014 that resulted in significant emotional distress and symptoms of PTSD. Since May 2016, patient has been seeing our social worker, Shira Sifton for psychotherapy on a regular basis and has made significant improvements. Upon meeting Angel for the first time, he appears to be a quiet and shy boy, but overall reports feeling good. He has been excelling in school and is excited about the future. From a medical and standpoint, Angel has recovered from the previous incident well and is growing into a confident young man.

If you should have any further questions, please feel free to call the clinic at 718-991-0605.

Sincerely,

Alejandra I Sacasa, MD
